

Krabat jockey

R82[®]

Krabat jockey

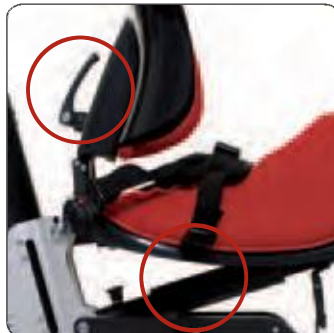

Height adjustable

The height adjustment is easily operated with a button integrated in the handle

Back and seat angle

The back is separately adjustable in proportion to the seat. Also the seat angle is adjustable individually

Adjustable foot supports

The foot supports are adjustable in height and angle

Foldable

The chair is lightweight, and is foldable in order to make transport easy

Krabat jockey by R82 is an active children's chair. The child is seated on a saddle with its legs apart. The spread position for the lower part of the body and the footrests provides a stable position for the child. This saddle-seating position has many physical advantages compared to traditional seating positions.

The seat is shaped so that it prevents the pelvis from moving forwards, which often is a problem for spastic children. The top of the seat prevents the thighs from being squeezed underneath a table when adjusting the height of the chair.

The Krabat jockey is available in two sizes.
