Adjustable forward lean

Adjusts to accommodate optimal walking angle and initiate the stepping process.

The Pony is a gait trainer for disabled children. The Pony has a frame shaped like an arrow with five castors. A central bar holds the chest support and the seat with pelvic support. The bar can be tilted forwards to stimulate walking. Between the legs is a plate to avoid scissoring. The Pony is for indoor use.

The Pony is available in four sizes and suitable for children between the ages of 11/2 - 12 years. Not all children are alike - that is why it is important to use the measuring chart to find the correct size.

Height adjustable seat

Allows for height adjustment to fit the user and provide optimum position when walking. The child is not supposed to sit on the saddle.

59-103 cm 67-125 cm

Back support

Allows for height and depth adjustment for positioning the pelvis into a neutral position. Furthermore the back support can be removed for easy access of child onto the Pony.

The Pony has brakes on the two front castors. Further, it is equipped with one drag wheel and directional stabilizer for added support.

Brakes on castors

STANDARD CONFIGURATION

Standard

As standard the Pony is delivered with back support and saddle. Please order accessories from the following pages.

Frame colour

Available in different colours for size 0, 1, 2 and 3

Yellow for size 0

Purple for size 1

Lilac for size 2

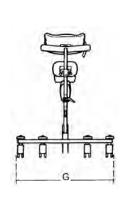

for size 3
